

Steel Shoulder Bolts - Hex. Head

construction grade

Shoulder Screws

P0142.SC

SHOULDER SCREWS

Material

Black alloy steel, strength 8.8. Hardness 38 HRC, tensile strength 830 N/mm².

Technical Notes

To DIN 7968

Tips

Do not tighten to standard strength class 8.8 torque; as the tightening torque is limited, by the presence of the reduced diameter

undercut under the head and at the shoulder/thread area.

SHOULDER SCREWS

Product Overview

Shoulder Screws & Shoulder Bolts

SHOULDER SCREWS

Steel shoulder screws

These are our least expensive option. They are produced to ISO 7379 standards.

Thread sizes from Ø4 M3 to Ø24 M20. We manufacture special shoulder screws to customer drawings with a minimum batch size.

Stainless steel shoulder screws

We have three different grades of stainless steel shoulder screws:

303 series – these are our standard grade of stainless (P0130.A2). They are strong and resistant to corrosion but not to very harsh environments such as salt water.

416 series – these are made from harder stainless steel with improved shear strengths but the parts are more prone to corrosion (see part no. P0131 and P0133).

316 series – these shoulder screws (P0130.A4) are very resistant to corrosion but are considerably more expensive than other stainless versions.

Shoulder bolts

Our range of precision shoulder bolts with hexagonal heads come in both steel (grades 8.8 and 10.9) and stainless steel (303 and 316 stainless). These bolts are manufactured to DIN 609 and DIN 610. We also have shoulder bolts for construction, manufactured to DIN 7968.

	DIN 609 standard length thread	DIN 610 short length thread	DIN 7968 construction thread
Grade 8.8 steel 	P0138.SC	P0140.SC	P0142
Grade 10.9 steel 	P0139	P0141	-
303 stainless steel 	P0138.A2	P0140.A2	-
